

A

- A body system value
 - for Extracorporeal Assistance and Performance section, 447
 - for Extracorporeal or Systemic Therapies section, 451
 - for Physiological Systems, 436
 - A device value
 - with Bypass root operation, 107, 227
 - with Fusion root operation, 127, 342
 - abdominal aortic aneurysms, 224
 - abdominal esophagus, 256
 - ablation, 77, 103, 160, 225, 397
 - abortifacient, 414, 415
 - Abortion root operation
 - overview, 414–415
 - defined, 414
 - devices used with, 398, 414–415
 - followed by other procedures, 49, 103, 398, 414, 415
 - abscess, incision and drainage of, 79
 - accessory pancreatic duct, 254
 - accessory sinuses, 179, 182
 - Activities of Daily Living Assessment root operation, 496
 - Activities of Daily Living Treatment root operation, 496
 - Acupuncture method, 464
 - adenoids, 197, 198, 202
 - adjustable gastric banding, 101–102, 254
 - Administration section
 - overview, 432–434
 - approaches used in, 434
 - body systems and regions for, 433–434
 - bone marrow and cell transfusion, 44, 92, 276
 - case studies, 442–445
 - character definition for, 432
 - code building cases, 439–441
 - description, 5
 - qualifiers used in, 434
 - root operations used in, 432–433
 - section value for, 429
 - substance values for, 434
 - adrenal glands, 271, 272, 363–364
 - airway devices
 - for Gastrointestinal System, 258
 - for Mouth and Throat, 204
 - qualifier values for, 450
 - for Respiratory System, 204
 - for sense organs, 183
 - allogenic qualifier, 91, 368, 400
 - Alteration device, 293
 - Alteration root operation, 128–129, 142, 180, 291, 293
 - American Health Information Management Association (AHIMA), 33
 - American Hospital Association (AHA), 33
 - amniocentesis, 49, 417
- continued on next page*

- amphiarthroses, 332
 - ampulla of Vater, 254
 - amputations. *See* Detachment root operation
 - anal sphincter, 258–259
 - anastomosis, 38, 254–255
 - Anatomical Orifices body system, 429–430, 431
 - anatomical regions, 137–156. *See also* general anatomical regions; lower extremities; upper extremities
 - Administration section and, 433–434
 - approaches for, 145
 - body part values for, 142–145
 - body system values for, 137
 - case studies, 152–156
 - code building cases, 147–149
 - code building exercises, 149–151
 - Control root operation, 139–141
 - description, 137
 - devices common to, 145
 - Division root operation, 141–142
 - organization of, 137–138
 - Osteopathic section and, 461
 - qualifiers used in, 145–146
 - root operations used in, 139–142
 - Ancillary sections. *See* Imaging section; Mental Health section; New Technology section; Nuclear Medicine section; Physical Rehabilitation and Diagnostic Audiology section; Radiation Therapy section; Substance Abuse Treatment section
 - “and,” defined, 36
 - anesthetic destructive agents, 434
 - aneurysms, 43, 102, 224–225
 - angioplasty
 - coronary, 46, 226–227
 - non-coronary, 229
 - animal tissue, 91, 107, 223
 - ankle, 46, 293–294, 332
 - annuloplasty ring, 115
 - anterior chamber of eye, 177, 183
 - anterior colporrhaphy, 397
 - anterior column (spinal) fusion, 344–345, 346
 - anterior cruciate ligament (ACL) procedures, 46, 94, 123
 - anterior lumbar interbody fusion (ALIF), 344
 - anus, 251
 - aortic body, 271, 272
 - aortic lymph nodes, 276
 - aortic valves, 129
 - aortocoronary bypasses, 227–228
 - aorto-femoral bypass, 229
 - appendectomy, 47–48, 71
 - appendix, 251
 - approach (character 5)
 - overview of guidelines, 47–48
 - for Administration procedures, 434
 - for anatomical regions procedures, 145
 - with changes during procedure, 39
 - for Chiropractic section, 466
- continued on next page*

- for circulatory system, 223, 225, 233
- CMS file definitions, 29
- code format, 10–14
- decision tree for, 47–48, 52
- for Endocrine System, 273
- for Female Reproductive System, 399–400
- for Gastrointestinal System, 258
- for Hepatobiliary System and Pancreas, 258
- for Lymphatic System, 278
- for Male Reproductive System, 384
- for Measurement and Monitoring root operation, 437
- for Mouth and Throat, 203
- for musculoskeletal system, 126, 336, 346
- for nervous system, 164
- for New Technology section, 503
- for Obstetrics section, 416, 417
- through orifices, 11–14, 564. *See also* Via Natural or Artificial Opening; Via Natural or Artificial Opening Endoscopic; Via Natural or Artificial Opening with Percutaneous Endoscopic Assistance
- for Osteopathic section, 462
- for Other Procedures section, 464
- for Placement section, 430
- for Removal root operation, 112
- for Respiratory System, 203, 204
- for sense organs, 182
- through or on skin or mucous membranes, 10–11, 564. *See also* External approach; Open approach; Percutaneous approach; Percutaneous Endoscopic approach
- for Urinary System, 367
- arteries. *See* coronary arteries; Lower Arteries; Upper Arteries
- arteriococcygeal gland (body), 271
- artery graft. *See* Autologous Arterial Tissue
- arthroplasty, 337
- arthroscopy, 46
- arthrotomy, 79, 121, 341
- articulations. *See* joints
- artificial opening approaches. *See* Via Natural or Artificial Opening; Via Natural or Artificial Opening Endoscopic; Via Natural or Artificial Opening with Percutaneous Endoscopic Assistance
- artificial respiration, 450
- artificial rupture of membrane procedures, 415
- ascending colon, 251
- Assistance root operation, 447, 453
- atlas, 332
- Atmospheric control root operation, 451
- atrial appendage, 102
- atrial fibrillation, 102, 225
- atrioventricular (AV) canal, 224
- auditory canal, 179
- auditory ossicle, 179
- autografts
 - for aortocoronary bypasses, 107
 - harvesting guidelines, 42, 70, 108, 128, 129
 - for spinal fusion, 342–343
- Autologous Arterial Tissue, 107, 383
- Autologous Tissue Substitute, 42–43, 114, 291, 293

Autologous Venous Tissue, 107
autonomic nervous system, 158–159
AV fistulas and grafts, 230
avulsions, 93
axialLIF (axial lumbar interbody fusion), 344
Axial Skeleton body system value, 475
axillo-femoral bypass, 229
axis, 332

B

B body system value
 for Physiological Devices, 436
 for Respiratory System, 197
B device value
 for Donor Organ, 452
 for Ear, Nose, and Sinus, 183
 for esophageal airways, 258
 for Intraluminal Device, Bioactive, 224
B qualifier value, for nervous system, 165
B root operation value, for Excision, 69
balanced tension technique, 463
bariatric procedures, 101, 254
Bartholin's glands, 395, 398
Beam Radiation, 481
behavioral type qualifier, 499
bilateral body parts. *See* laterality guidelines
bile ducts, 254
bioactive coil, 224
bioactive intraluminal device, 233
Biofeedback root operation, 498
biopsy procedures
 bone marrow, 40, 69, 78–79, 276
 breast, 293
 bronchial, 201, 202
 cervical, 397
 followed by more definitive procedure, 40, 70, 201, 293
 qualifiers for, 40, 69–70
 root operations for, 40, 69, 78, 79–80, 276, 293
bladder
 body part value for, 366
 organization of, 363–364
 procedures, 43, 365, 366–367, 397
bleeding, control of, 38, 41, 79, 123–125, 139–141, 145
blepharoplasty, 128–129
blood and blood products
 blood cell type qualifier, 453
 Pheresis root operation for, 451, 453
 as substances, 17, 434
 Transfusion root operation for, 432
blood clots, 81, 102
body cavities. *See* general anatomical regions
body part (character 4)
 overview of guidelines, 44–46
